REVIEWS

The Irish Times

"Timely and succinct. A first-class study."

Irish Studies Review

"Subtly recalibrating the narrative of 20th century Irish culture, Hutton-Williams' slim, meticulously researched and powerful volume shows how far-reaching and effective MacGreevy's implementation of the avant-garde aesthetic was in a nervous and conservative inchoate nation."

Review of Irish Studies in Europe

"A most welcome contribution to modernist studies and Irish cultural history. The archival research underpinning the argument undeniably constitutes one of the major strengths of the monograph."

International Yeats Studies

"The plural value of MacGreevy's contributions to Irish culture are validated by this timely consideration of his underappreciated public service."

- Speaks to current interest in rethinking the first 100 years of Irish statehood
- Demonstrates through patient elaboration how Thomas MacGreevy and his circle moved the nation forward into a new age of politics, thought and feeling
- Contributes to the burgeoning interest in MacGreevy himself, a figure whose remarkable array of contacts and friendships include Éamon de Valera, Paul Valéry, T.S. Eliot, James Joyce, Samuel Beckett, Wallace Stevens, Mainie Jellett and Jack Yeats
- Brings alive the bruising encounters between Irish avant-gardists and their adversaries, giving additional resonance to these debates
- Sheds new insight on the vexed issue of cultural representation through its attention to social networks, assured handling of drafts, letters and other archival materials, and close readings of individually significant poems and paintings
- Furnishes succinctly and effectively the conceptual and historical context needed to understand its arguments
- Features a useful chronology as part of its prefatory material, hundreds of endnotes that support further discussion, and ten vivid illustrations that allow the reader full immersion in visual masterpieces
- Suitable for scholars and students of Irish Studies, international modernism, postcolonial literature and twentieth-century art
